13 years's journey - from UKG to class 12 seems to be coming to an end, but the more I look at it closely, the more I feel that this is just the beginning, all the things I learnt by seeing, listening and trying are going to be put on trial by the life in front of me. We all ofcourse forget all things we "studied" in class, but those things, small things that we knowingly or unknowingly learn from our peers, teachers in our school stay with us forever. Our life is mostly limited to our own immediate surroundings, but my school opened a window to a bigger world, a world of various kinds of people; all good in the own ways. The teachers here not just taught us things necessary for exams, their light touched us and helped us find ourselves a path in life. It is my firm belief that teachers here are the among the best humans, I will ever meet in my life. Finally, I would like to thank all the people from near, far and apart, who have made this 13 year's journey of mine more bright, joyous and dreamlike.

From the day I entered through those gates till today, this amazing institute has given me countless memories. Each day was filled with amusement and learning was fun with my friends and teachers. LRDAV will always be a part of the most delicate part of my life. I find myself lucky that I got my primary education from the best teachers. Apart from academics, my school also improved my social skills. My teachers have always guided me out of the undesired mud and showed me the right path. Especially after closure of schools for an unbearably long period due to COVID, I realised the environment in our school is best for studying. The gossips, jokes and fun in the classrooms aided my studies in school. Since my foundation was made strong in school, I'm certain it will help me in my higher studies. I fall short of words describing how thankful I am towards all the staff, my classmates, my juniors and seniors for making my school life memorable...

Success is where preparation and opportunity meet. In the temple of learning, it is always appreciable if teachers inspire and motivate the average level students with their expertise and experience for their holistic growth. Students relishing the charm of their success should continue their hard work with fidelity.

DYNAMO speaks about the galvanic achievers in AISSE & AISSCE, and also encompasses the list of successful students in different prestigious entrance examinations. This academic year has produced a handsome number of achievers in this segment.

I proudly acknowledge the perseverance and hard work of our students and teachers who have been continuously inculcating the spirit of honesty in their endeavour and making them think and plan big.

I wish the young achievers all success in their future career.
